

Find a contractor

Whether you're investing in high-efficiency heating or cooling equipment, or just tuning up your existing system, it is important to work with a contractor who demonstrates a commitment to quality.

DTE participating contractors are the only contractors eligible for this program. Search the DTE Energy Efficiency Directory and learn more about how you can find a participating contractor to fit your home and project's needs. Visit dteenergy.com/eed

To qualify for rebates:

- You must be a DTE gas or electric customer
- The equipment you install must meet program eligibility guidelines
- You must use a DTE participating contractor

It's easy to get your rebates

Select qualifying energy efficient equipment with the help of your participating contractor. Your contractor knows which equipment qualifies for rebates and will size the equipment for maximum efficiency.

Have the contractor install the equipment or perform the diagnostic tune-up on your furnace, boiler, or air conditioner.

Sign the rebate application. The contractor will submit the rebate application on your behalf.

Receive your rebate check within six to eight weeks.

DTE

Heat and cool your home more efficiently

With DTE Energy's rebate program, you can save money and energy when you upgrade your old heating and cooling equipment—including boilers, furnaces, central air conditioners, and thermostats—with high-efficiency models.

DTE can also help you take care of the heating and cooling equipment you already have. You can receive \$75 when a participating contractor performs a diagnostic tune-up on your furnace, boiler, or air conditioner.

Heating and cooling equipment

New heating and cooling equipment can be 40% to 50% more efficient than units installed 20 years ago.* When you upgrade to energy efficient equipment, you use less energy and save money on energy costs.

Multiple purchases mean multiple rebates. See the chart for measures and rebate amounts.

Diagnostic Tune-Ups

Properly maintained heating and cooling equipment runs more efficiently, lasts longer, and is safer. Your participating contractor will use state-of-the-art diagnostic tools to evaluate your equipment's performance and then make adjustments to enhance its operation.

DTE Gas Customers	Good	Better	Best
Furnace	\$100 95% AFUE	\$200 96% AFUE	\$500 97% AFUE or higher
Boiler			\$900 95% AFUE or higher
Thermostat			\$50 Wi-Fi enabled
Furnace or Boiler Tune-Up with Combustion Analysis			\$75 natural gas units

DTE Electric Customers

Central Air Conditioner	\$100 15 SEER	\$200-300 16-17 SEER	\$500 18 SEER or higher
Thermostat			\$50 Wi-Fi enabled
Central Air Conditioner Tune-Up			\$75 diagnostic tune-up
Air Source Heat Pumps**			\$500 18+ SEER 14+ EER 9.7+ HSPF All three must be met
Ground Source Heat Pumps**			\$500 19 EER or higher
Ductless Mini-Split Heat Pump Systems**			\$300 18 SEER or higher

*Source: energystar.gov. Valid for installation dates from Jan. 1, 2021 to Dec. 31, 2021. Good/Better/Best options are defined based on equipment incentive levels. Customers can upgrade more than one piece of equipment with different efficiency levels.

**Air source and ground source heat pumps are eligible only for customers who are replacing an existing heat pump system and use electricity as the primary heating fuel, or replacing a central air conditioner system with an air source heat pump. All air source heat pumps must meet the minimum requirement levels of: 18 SEER, 14 EER, 9.7 HSPF to be eligible for a rebate. Ductless mini-split heat pumps are eligible for customers who are replacing a heat pump or electric resistance heating.
