

## Love Your Furnace

Give it the attention it deserves for warming your home.

Your heating equipment works hard to give you a comfortable home all winter long. Make sure it has the care it needs to run efficiently. **DTE's diagnostic furnace or boiler tune-up** will help ensure your equipment is operating at its best. A tune-up can help lower your energy costs and comes with a **\$50 rebate**.

This is more than a standard tune-up. We work with specially trained contractors who:

- Boost system performance and reliability
- Use a diagnostic tool to find issues that could be missed during a visual check
- Make changes to help extend the life of your equipment
- Help improve comfort and lower your energy costs

**Schedule your diagnostic tune-up today.**

Visit [dteenergy.com/rebates](https://dteenergy.com/rebates) or call **866.796.0512** for more information or to find a contractor near you.
